

KKRISH PINJANI

AI and Data Science / Data Analyst

(+91)- 9637870228 | pinjanikkrish@gmail.com | www.linkedin.com/in/kkrish-pinjani-b3b96a37a/ | <https://github.com/kkrishpinjani>

Analytical undergraduate in AI and Data Science with expertise in SQL, Python, and data optimization. Proficient in building data pipelines, optimizing SQL queries, and applying machine learning, data analysis, and Power BI dashboards for actionable insights. Seeking a Data Scientist role to apply technical and analytical skills to deliver impactful results.

WORK EXPERIENCE

Data Science Intern | NexGen Analytix, Pune | Jul 2025 – Present

- Cleaned and transformed raw datasets using Python (Pandas, NumPy) for analytics and reporting.
- Optimized SQL (MySQL) queries, improving performance by 30%.
- Built and automated Power BI dashboards using Python-based ETL pipelines for daily KPI updates.
- Performed EDA and visualization using Matplotlib and Seaborn to derive insights.

Python Developer Intern, PSYLIQ | Jan 2024 – Feb 2024

- Developed machine learning models using Python (Scikit-learn, Pandas) for classification tasks.
- Executed data cleaning, feature engineering, and model evaluation.
- Visualized insights and model metrics using Matplotlib and Seaborn.

SKILLS

- **Programming & Databases:** Python, SQL (MySQL)
- **Libraries & Tools:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel, Tableau
- **Data Analysis:** Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Statistical Analysis
- **Machine Learning:** Machine Learning, Classification Algorithms
- **Other Tools:** Git, Jupyter Notebook
- **Expertise:** Data Analytics, Dashboard Development, Strong problem-solving and teamwork skills

PROJECTS

Sales Dashboard | Power BI | May 2025

GitHub: github.com/kkrishpinjani/Sales-Dashboard

- Built an interactive Power BI dashboard to track sales KPIs and performance metrics.
- Cleaned and transformed raw data to ensure accurate insights
- Helped management identify top-performing regions and product categories.

Zomato Data Analysis | Python (Pandas, Matplotlib, Seaborn) | Aug 2025

GitHub: github.com/kkrishpinjani/Zomato-Data-Analysis-Using-Python

- Analyzed the Zomato dataset to uncover customer preferences and restaurant performance
- Performed data cleaning, EDA, and visualization using Python libraries.
- Identified insights on top cuisines, order modes, and average spending trends.

Ferns-N-Petals Sales Analysis | MS Excel | Sept 2025

GitHub: github.com/kkrishpinjani/Ferns-N-Petals-Sales-Analysis

- Analyzed over 1,000 orders worth ₹35.2L to track sales performance.
- Built interactive dashboards using Pivot Tables and Charts.
- Highlighted key trends by occasion, category, and region to support decisions

EDUCATION

Bachelor of Engineering in AI & Data Science, ISBM College of Engineering, Nande, Pune, India | CGPA: 7.07 | 2021-2025
Maui Junior College of Science, Akola | July 2020 - July 2021 - HSC (12th) - Percentage: 94.4%

CERTIFICATIONS

- Python for Data Science, AI & Development | IBM (Coursera) | October 2023.
- Data Science Foundations | Great Learning Academy | April 2024
- Python Developer Intern | PSYLIQ | Feb 2024
